What makes us special

Lived values

The excellent properties of wood have always been the benchmark for all products from the house of ter Hürne – from the beginnings of the company more than 60 years ago until today. Wood remains our role model for smart, alternative materials for natural healthy living.

I feel deeply relaxed

**ter Hürne floors for your
healthy living environment**

We create products that you come into contact with every day. They are an important part of your home. Our floors support the sense that you and your loved ones are in good hands. A healthy living environment is important in ensuring things stay that way.

Product construction Dureco

- 1 Top Layer**
We seal the surface with high-grade resin, into which we bind the natural mineral corundum.
- 2 Design Layer**
The design carrier consists of natural wood fibres, as does the baseboard.
- 3 Baseboard**
The baseboard is the healthy centrepiece of the floor. We manufacture these from extremely dense wood fibres.
- 4 Backing Layer**
We even manufacture the wood pulp stabilising layer.

1 **Corundum** is a natural mineral from the sapphire family. It has a value of 9 on the Mohs hardness scale*. Only diamond, with a value of 10, has a higher hardness value. The high degree of abrasion resistance and temperature stability make corundum the ideal component for everything that is subjected to stress.

*A reference scale created by Friederich Mohs for determining the hardness of materials

*Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

ACTING SUSTAINABLY

**Not a trend
but an attitude**

Our responsibility.

For the dureco floor, we use wood from certified sustainable forestry.

This is confirmed by the PEFC™ certificate, which all dureco floors have been awarded. The careful selection of the growing regions and the trees that grow there are crucial for the high quality standards of ter Hürne. The principle of sustainable economic and resource-saving trade is a fundamental part of our philosophy and extends to all areas and processes of our company.

I feel how my life is becoming easier

Smart floors for your smart home

We at ter Hürne make our floors with one aim in mind: That you can lay them easily. That they are practical and comfortable for you in everyday life. And they offer you the best possible protection.

In order to make that possible, there is a great deal of intelligence in every ter Hürne floor. We coordinate everything precisely: starting with the product structure, the materials used, the connection technology right through to the sealing. This results in something that you should take for granted: a smarter floor that should make your life a bit easier.

More information
SEAL-Technology:

*Suitable for hot water and electric underfloor heating systems.

Non-slip and flame resistant.

according to EN 685

Wood and water do not normally get on well together. With Dureco, we have overcome this barrier thanks to our SEAL technology. This is a combination of various performance components, which together form a composite to provide effective protection. SEAL prevents standing water from penetrating into the floor – for up to 24 hours. With Dureco, life is always relaxed. As well as sustainable and lived in a healthy home environment.

EASY INSTALLATION

Smart Connect Pro

SmartConnectPro is the quick and secure click connection for a lastingly beautiful floor. The special design of the profile reduces the penetration of liquids and provides additional moisture protection. Our smart connection makes laying our floors child's play.

It's time to get to work with a hammer and a tapping block. The floorscape fits together plank by plank. Our system is so simple you can even install your floor on your own. It is secure, and the connection ensures long-lasting enjoyment of your new floor.

Easy

Virtually no tools or force required.

Secure

You automatically align the individual planks correctly. This will give good results.

Quick

Install your floor a lot faster and walk on it immediately.

Flexible

You can install it either as a floating or a glue down installation. If you choose a floating installation, you can take up the floor as easily as you laid it.

The experience of natural design

Natural design for your well-being home

We design products for your living space. In doing this, we follow the design principle: easy to install, long-lasting in use and naturally beautiful. Our product design combines function and aesthetics.

Although there is no standard for 'beautiful', it is a principle that inspires us here at ter Hürne. Preserve what is original. Try something new. And combine the two.

FORMATS AND DESIGNS

The right dimension for your sense of spaciousness

Classic Line
Planks
1285 x 192 x 12mm

V-GROOVE

All Dureco floors have a 4-sided V-groove, which expresses the format of the plank or tile.

Tiles
635 x 327 x 12mm

SURFACE STRUCTURES

Feel the difference

The Dureco range from ter Hürne includes eight different surface structures. When a surface is described as "synchronous" the structure can be felt in exactly the same place as the the decor depicts it.

Seeing and feeling must be brought in line to create what is needed: a perfect combination in perfect harmony.

MY VIRTUAL FLOOR

My Room Studio

With our virtual Room Studio you can view all of our floors in your own home. Here and now. Just use your smartphone. As soon as you are in the Room Studio you have two options:

- 1 You can either take a picture of your room with your smartphone and select your preferred floor, which you lay virtually.
- 2 Or you can select room images from our gallery and virtually lay your preferred floor there.

With our virtual Room Studio you can look at all of our floors in the comfort of your own home either on your laptop or desktop computer. Due to the size of the display, this is sometimes the better alternative. Just click on the Room Studio button on the right-hand side of the screen.

Insert your own room photo, take out the old floor and experience the new floor in your own room!

PLANKS

Classic Line

STYLISTICALLY CLEAR
AND TIMELESS

Planks

In the Dureco Classic Line, you will find the classic among the formats. The plank represents the most traditional and original form of the wooden floor. Planks are primarily characterised by the particular ratio of the plank length to width. They naturally convey the character of the different woods. A floor with a classic impression.

TILES IN STONE DECORS

Stone Line

STRAIGHT AND STYLISH

Tiles

Natural stones speak their own language, just like wood. Here too, the differing facets of nature are inexhaustible. Light sandstones, grey basalts and dark granites. Stone looks sophisticated and grand, at times old and wise, at others fresh and vibrant. Our stone decors have this character. With our knowledge of the spirit of the material, we create floors that will impress tile lovers.
